Heat Exchanger Servicing

We specialize in the cleaning and servicing of heat exchangers. We offer mobile cleaning systems to mechanically and chemically clean all types of exchangers. STS can fully outsource your plate heat exchanger cassette replacement, ensuring leak and trouble free operation. Tube bundles can be cleaned, leaking tubes identified, sealed and re-tubed. Specialized heat exchangers can also be cleaned and serviced. We also develop heat exchanger performance databases to enable plant personnel to easily record online performance and schedule critical maintenance.

- ◆ Heat exchanger cleaning
- ◆ Plate heat exchanger cassette replacement
- ◆ Leaking tube identification and repair
- ◆ Tube replacement
- ◆ Performance monitoring
- ◆ Training and consulting.
